and a big expense in buying out the settlers.
ad. The same needs no more protection on their summer range than can be given by game wardens.
3d. The elk are almost all gone from that part of the country before the beginning of the close season. It is a mountainous regios, except as to the ranch country before mentioned.
I have sent you a map of this country, in which you can see the Jaekson's Hole freserve as it would be if extended from the National Park. Also the jame preserve on the red desert, and the trail elk and other game take in going to their winter range.
I have also talked this matter over with Nelson Yarnell, another of the best guides on this side of the divide, and he fully agrees with Mr. Dodge and me.
I have seen large bands of elk, in November, making their piigrimage, to this red desert country. Many of the readers of Rgaxarion will remember, reading Mr .
Yarnell's story,
3,000 Eik." That band
was on its way to the same winter feeding grounds. Mr. Dodge says fully 20,000 elk pass his place every fall, all bound for the same winter range. If the L. A. S. can pall this scherne throagh Congress, it will be one of the greatest triumpins for game protection yet achieved. Of course it weuld put all the territory included in these preserves under the same protection and management as is row afforded the Nationa! Park. We are thoroughily aroused to the necessity of immediate action if we could afford adequate protection for our game, and if ary interested sportsman desires further light on the subject Mr. Dodge and I will giadiy furnish it.
Lander, Wyo.
This is a most excellent proposition, and the officers of the L. A. S. will undoubtedly present a bill to Congress, at its next session, asking that the Park limits be extended so as to include the portion of the red desert indicated on the above map.- ED itor *

## A WINTER GAME PRESERVE.

FIANE DUNHAM, M,D.

Editor Recreation: In the Junc number of your Sportsman's Bible you present a few ideas in relation to adding to ou: game preserve in this State.
I. read tre article, and then began thinking. I might have gone no farther than the thinking stage had not that veteran guide and sportsman, Ira Dodge, of Cora, Wyo., paid our city a visit. Our talk naturally turned to hunting and fishing, and, as a consequence, to game laws and game pro-
will find a tract of country marked "the red desert." We conclude that by setting off a pertion of country between the twelfth guide meridian on the East, and the thitteenth guide meridian on the West, the fith standard parallei (North) on the South, and the South boundary of Fremont county on the North, enough of this territory would be taken in to furnisis a winter range for the elk, and other jarge game, for all time.

MAP OF PROPOSED WINTER GAME PRESERTR
tection. Withour doubs Colonel Dodye is the best posted man in the West on our big gane and :heir haunts.

Vie werediscussing the question of estab. lishing a winter same park, and concluded to put the L. A. S. in possession of sorme iacts, and to all its attention :o a strescin of courtiry that is pracrinally of no value to any one. but which fumishes winter rang: io: raore elk and anteope than all the remaining portion of $W$ yomirg.

Lock at a map of this State, and in the sor:hern part of Sweerwater countr you

Weare also ineartily in favor of sxtendinf the park limits so as to include all of Jack. son's Hole proper. In this we difer slighely from the editor oi Rerretition. To make the East bouncazy of the timber easerva the Eist boundary of the conteriplared preserve would be :0 go fariter East thon is secessaty or wige. TBis is jor several rtasons.

Ish. All alorg the head ai lind river. the Du Nuir, Forse creek. and a!l the tributaries of lind river are improved ranches. Many of these are patented, and we would have a big igh: on out iands, 3
